SPECIAL PERFORMANCE BOOSTER

JUNE 2024 COMPUTING 2 HRS

Do not open this booklet until you are told to do so. While you are waiting, read and observe the following instructions carefully. Write your name and index number in ink in the spaces provided above.

*This booklet consists of two papers; **I** and **II**. Answer Paper **2** which comes first in your answer booklet and Paper **1** on your Objective Test answer sheet. Paper **2** will last for **1** hour and 15 mins after which the answer book let will be collected. Do not start Paper until you are told to do so. Paper **1** will last 45 minutes.*

VERY IMPORTANT INSTRUCTIONS

1. *Read through the questions, brainstorm and plan your answers before you finally answer them. This is one of the good ways to manage your time in an exam and to do well.*
2. *Write clearly, use simple expressions and provide the best answers possible.*
3. *Write answers that provide additional information. If you just list answers or provide one to three worded answers, your will fail the paper.*
4. *Do well to explain your answers to help earn full marks. Check your units of measurement, spellings, grammar and read over your work before submitting.*
5. *Write question numbers boldly, start the answers to every new major question on a new page.*
6. *Do not rewrite the full question before answering. Only write the question number.*
7. *Show workings in all instances in section B if the question involves calculations.*

PAPER 2

[60 MARKS] 1 HOUR

This paper is in two sections A and B. Answer Question I on Section A and any other three questions in Section B. Answer all the questions in your answer booklet.

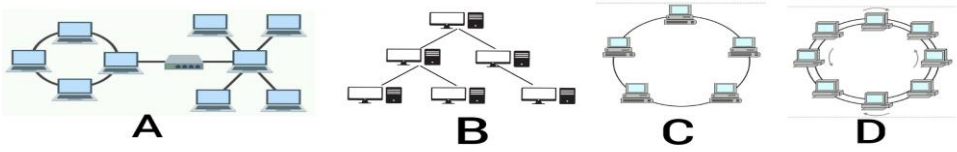

SECTION A

[24 MARKS]

Answer Question 1

[Compulsory]

1. a. Agyekum an IT specialist has visited your school as part of your teacher's effort to teach you practical IT lessons through a professionals in the field. When Mr. Agyekum entered your classes the images labeled A-D were boldly printed on his T-shirt. You identified them as typologies.

i. Identify the topologies labelled A, B, C and D (4 marks)

ii. State one feature each of the diagrams labeled above. (4 marks)

b. i. At the back of Mr. Agyekum's T-shirt when he turned to write on the board were the imaged below. Provide the names of the cloud storage platforms below. (3 marks)

ii. State three threats causes of data corruption based on the above (3 marks)

iii. Give three functions of the transport layer in the Open System Interconnection (OSI) model. (6 marks)

iv. You have learned information security is very important but how would you explain it to a basic 4 learner? (2 marks)

v. State two features of the Charms bar. (2 marks)

SECTION B

[36 MARKS]

Answer three questions only from this section.

2. a. Just as we live out footprints in the sand at the beach, we also live our digital footprints on the internet. How will you explain **digital footprint** to your grandmother? (2 marks)

b. Explain the following types of digital footprint to your grandmother who is excited about term.

i. Passive

ii. Active (4 marks)

c. i. List any four Artificial Intelligence software. (4 marks)

ii. Write down the procedure for resizing a picture in PowerPoint. (2 marks)

3. a. i. John is a student in grade 8 who loves playing video games. One day, he learned that the games he enjoys are created using something called a programming language. Curious, John decided to research what a programming language is. Based on John's research, explain what a programming language is in your own words. (2 marks)

ii. State three uses of programming language. (3 marks)

b. i. Define social media sites. (2 marks)

ii. Outline three benefits of video sharing sites. (3 marks)

c. I want to look for some useful information from two search engines. Which ones will you recommend? (2 marks)

4. a. i. You are a student working on a computer project. Your teacher has asked you to save your project files with the correct file extensions. What is a file extension? (2 marks)

ii. Give three importance of file extensions. (3 marks)

b. i. State two advantages of AI. (2 marks)

ii. Outline three requirements of a broader work environment. (3 marks)

c. List any two types of printers. (2 marks)

5. a. Mr. Mensah gave an assignment to the students to research and write down four characteristics of the fifth generation of computers. Imagine you are one of the students in his class. Write down four characteristics of the fifth generation of computers. (4 marks)

b. i. Give three ways of reducing the heat of a printer. (3 marks)

ii. List three wearable display technologies. (3 marks)

c. State the uses of the following MS Excel functions.

i. MAX

ii. AVERAGE (2 marks)

PAPER 1

OBJECTIVE TEST

Answer all questions.

Each question is followed by four options lettered A to D. Find out the correct option for each question and shade in pencil on your answer sheet the answer space which bears the same letter as the option you have chosen. Give only one answer to each question.

1. What is a component of a computer system that stores data and programs for future use?

a) CPU
b) RAM
c) Hard drive
d) Monitor

2. Which of the following is an input device?

a) Printer
b) Keyboard
c) Monitor
d) Speaker

3. What technology allows people to communicate and share information over long distances?
a) Telephone
b) Television
c) Internet
d) Radio

4. Which of the following is an example of productivity software?
a) Photoshop
b) Microsoft Word
c) Adobe Acrobat
d) Google Chrome

5. What type of software is used to create slideshows for presentations?
a) Spreadsheet software
b) Word processing software
c) Presentation software
d) Database software

6. Which of the following is used to create flyers, brochures, and newsletters?
a) Presentation software
b) Spreadsheet software
c) Desktop publishing software
d) Word processing software

7. What type of software is commonly used for organizing and analyzing data?
a) Presentation software
b) Desktop publishing software
c) Spreadsheet software
d) Word processing software

8. Which of the following is an example of a communication network?
a) LAN (Local Area Network)
b) CPU (Central Processing Unit)
c) RAM (Random Access Memory)
d) HDD (Hard Disk Drive)

9. What technology allows users to access information and communicate with others worldwide?
a) Television
b) Radio
c) Internet
d) Telephone

10.Which of the following is a social media platform?
a) Microsoft Excel
b) Twitter
c) Adobe Photoshop
d) AutoCAD

11.What is the primary concern of health and safety in the use of ICT tools?
a) Protecting personal information
b) Preventing physical injuries
c) Avoiding computer viruses
d) Ensuring software compatibility

12.Which of the following is an example of information security measure?
a) Using strong passwords
b) Leaving computers unlocked
c) Sharing login credentials
d) Ignoring software updates

13.What technology allows computers to understand and process human-like intelligence?
a) Robotics
b) Artificial intelligence
c) Algorithm
d) Web technologies

14.What is the process of breaking down a problem into smaller, more manageable parts?
a) Computational thinking
b) Algorithm
c) Artificial intelligence
d) Robotics

15.Which of the following is a characteristic of a good algorithm?
a) Complexity
b) Efficiency
c) Length
d) Colorfulness

16.What field of study focuses on creating machines that can perform tasks that require human intelligence?
a) Robotics
b) Computational thinking
c) Artificial intelligence
d) Web technologies

17.Which of the following is an example of a web technology?
a) Java
b) Python
c) C++
d) Ruby

18.What technology allows computers to connect and communicate with each other?
a) Internet
b) Social media
c) Information security
d) Web technologies

19.What is the main purpose of a firewall?
a) Protecting against physical damage
b) Preventing unauthorized access to a network
c) Speeding up internet connection
d) Filtering spam emails

20.What is the term for the process of encoding data to prevent unauthorized access?
a) Decryption
b) Encryption
c) Authentication
d) Authorization

21.What type of software is used to create and edit text documents?
a) Spreadsheet software
b) Presentation software
c) Word processing software
d) Desktop publishing software

22.Which of the following is a popular web browser?
a) Microsoft Excel
b) Google Chrome
c) Adobe Photoshop
d) AutoCAD

23.What is the term for the rules and procedures used to securely transmit data over a network?
a) Encryption
b) Authentication
c) Protocol
d) Firewall

24.Which of the following is an example of a social media platform?
a) Instagram
b) Microsoft Word
c) Adobe Acrobat
d) AutoCAD

25.What technology allows computers to mimic human behavior and intelligence?
a) Artificial intelligence
b) Robotics
c) Algorithm
d) Computational thinking

26.What is the process of arranging data into rows and columns to perform calculations?
a) Word processing
b) Desktop publishing
c) Spreadsheet
d) Presentation

27.Which of the following is a feature of presentation software?
a) Creating budgets
b) Editing photos
c) Making slideshows
d) Writing letters

28.What is the term for the design and layout of printed materials?
a) Word processing
b) Desktop publishing
c) Spreadsheet
d) Presentation

29.What type of software is used to create charts and graphs?
a) Word processing
b) Desktop publishing
c) Spreadsheet

d) Presentation

30.What is the main purpose of a computer network?
a) Sharing resources and information
b) Playing games
c) Writing letters
d) Editing photos
31.What technology allows users to access the internet wirelessly?
a) LAN
b) WAN
c) Wi-Fi
d) Bluetooth

32.Which of the following is a potential risk of using social media?
a) Increased productivity
b) Identity theft
c) Improved communication
d) Enhanced creativity

33.What is the process of converting plaintext into ciphertext?
a) Decryption
b) Encryption
c) Authentication
d) Authorization

34.What is the purpose of a search engine?
a) Sending emails
b) Browsing social media
c) Finding information on the internet
d) Editing photos

35.Which of the following is an example of artificial intelligence?
a) Siri
b) Microsoft Excel
c) Adobe Photoshop
d) AutoCAD

36.What is the term for a sequence of instructions designed to perform a specific task?
a) Algorithm
b) Firewall
c) Encryption
d) Authentication

37.Which of the following is a benefit of computational thinking?
a) Increased creativity
b) Decreased problem-solving skills
c) Limited imagination
d) Enhanced logical reasoning
38.What technology allows computers to interact with the physical world?
a) Artificial intelligence
b) Robotics
c) Algorithm
d) Computational thinking

39.What is the term for the process of finding errors in computer programs?
a) Debugging
b) Encrypting
c) Authorizing
d) Decomposing

40. All the following are examples of physical data treats except .....
    a) data theft
    b) spyware
    c) fire
    d) lightning
